DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 10-18, drawn to a liquid crystal display, classified in class 349, subclass143.
 - II. Claims 19-29, drawn to a device for driving a liquid crystal display, classified in class 345, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as to not require the specifics of the driver integrated circuit of invention II. Invention II has separate utility such as to not require the specifics of the common electrodes and the segment electrodes. See MPEP § 806.05(d).
- 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
